Education

Concordia University, BS in Computer Engineering Sept 2021 – May 2025
• GPA: 3.8 Montreal, QC
• **Courses:** Data Structures & Algorithms, Operating Systems, Computer Graphics, Machine Learning

Experience

Software Tester, Genetec – Montreal, QC Jan 2024 – Aug 2024
C#, .NET, Powershell Scripts, Docker
• Developed **automation scripts** to streamline repetitive testing processes, reducing manual effort and time spent
• Validated seamless deployment and upgrades as part of the Staging team
• Implemented automated data scraping on new test machines using **Grafana**

Software Developer, Presagis – Montreal, QC Sept 2022 – Dec 2022
C++
• Increased code coverage by writing comprehensive **unit and automated tests**
• Conducted rigorous software testing, identifying and reporting critical bugs during exploratory testing
• Gained hands-on experience with **Agile** workflows, actively participating in sprint planning, daily stand-ups, and retrospective meetings

Projects

Sign-Lingual 2023
• Developed an **Android** application enabling real-time sign language translation to text or speech using live camera
• Integrated **OpenAI's Language Model** for typo correction and contextual understanding of recognized signs
• Trained a machine learning model using dataset to recognize alphabetical hand signs with high accuracy

Autonomous Hovercraft 2023
• Designed and built a hovercraft capable of hovering over 5mm obstacles
• Implemented **real-time** processing using IR sensor for continuous environmental detection on a **Microcontroller**
• Developed a reliable path finding algorithm to autonomously navigate a track from the sensor input

JobHunt – Online Recruitment Platform 2023
• Developed a job hunting websites to facilitate communication between employers and students
• Built using **Node.js** for backend development, **React** as front-end and **MySQL** for data management

Technical Skills

Languages: C++, C#, Python, Java, Powershell, SQL, JavaScript

Databases: MySQL, MongoDB, Microsoft SQL Server

Frameworks: Docker, React, Node.js, Git, .NET

Language: English, French

Miscellaneous: Bouldering, Volleyball, Puzzle game (The Talos Principle, TFT)
